

ENERCON ENGINEERING, INC.

Is a privately held Limited Liability Corporation
headquartered in East Peoria, IL

DUNS# 079136529

CAGE# 32GX4

ENERCON ENGINEERING, INC. has, since 1975 been an innovator in the power generation industry. Enercon has pioneered several first for the distributed power generation industry: inventor of the power module type portable power unit; created the Evolution control system that provided configurable modes of operation based on the application requirements; was the first switchgear/genset packaging company to provide complete load testing of single and paralleling generators, this is to mention just a few of our firsts, most of which are now considered an industry standard. Not only are we innovators, but we are unique in that we are one of a very small group of companies who manufacture generator controls, switchgear

and package the generator - integrating and testing the unit as one complete system. Or, Enercon can provide any single portion of a complete working system. Enercon has worked with all the prime mover manufactures, so whether there is a preference for one manufacture's engine or you're trying to integrate multiple manufactures engines to work as an overall system, Enercon can provide the integration and controls to create a total working solution. Enercon is a "one stop shop" for your prime and standby power needs, and with three manufacturing facilities in the US, Enercon has the capacity for large projects and provides a regional presence for servicing our customers.

CURRENT AND PAST CUSTOMERS (PARTIAL LIST)

Army Corps of Engineers	NASA	Taiwan Air Force
US Army	National Science Foundation	Raytheon
US Air Force	FEMA	Caterpillar
US State Dept.	Ministry of Health	Cummins
DoD	Federal Bureau of Prisons	MTU
US Navy	Missile Defense Agency	PEMEX
Army LIA	US Coast Guard	Northrup Grumman

We also have a large number of vendor partners that help us provide comprehensive solutions and superior service.

FUNCTIONAL AREAS

Standby power generation	Genset packaging	Deployable power generation
Prime power generation	SCADA systems	Electrical R&D
Generator Switchgear	Power modules	PLC programming
Genset Enclosures	CHP	Robust testing facilities

CREDENTIALS

Multi-facility manufacturing	ISO 9000:2001
SAM Registered	Quality Assurance Plan
SBA Small Business Registered	Credit Card Purchasing
Preferred Supplier for CAT Global Solutions	

NAICS CODES

221122	335313
221121	335314
221118	332312
335311	332322
